Profile

Motivated Computer Science student with a strong foundation in software development, web application design, database management, comprehension, and analysis. Expert in C#, React, TypeScript, SQL, Java, and Python, with a solid understanding of data structures and algorithms. Experience in designing and implementing scalable web applications and integrating APIs to improve system performance. I am passionate about solving complex problems, writing clean and efficient code, and continuously learning new technologies such as artificial intelligence and machine learning. I am excited to use my technical skills and gain experience with artificial intelligence technologies through your program.

Skills

- **Programming Languages:** C#, Python, TypeScript, JavaScript, PHP, SQL, HTML5, CSS, Java, Swift, GOLANG, Angular.
- **Frameworks & Libraries:** React, .NET, Node.js, Tailwind CSS, IE, .NET Framework.
- **Tools & Platforms:** Git, Vite, Firebase, REST APIs, Oracle, Linux, Windows.
- **Concepts:** Object-Oriented Programming (OOP), Microservices, Database Management, CI/CD, Responsive UI Design, CRUD Operations.
- **Soft Skills:** Problem-Solving, Teamwork, Effective Communication, Time Management, Quick Learning, Project Management.
- **Languages:** **Intermediate:** French **Advanced:** English **Native:** Spanish

Experience

Systems assistant

2021 – 2022

La Canasta Store – Bogotá, Colombia

- Managed inventory and supplier relationships by administering the store's product database, implementing a scheduling system for product receipt, and processing supplier payments, which improved supply chain efficiency.
- Improved customer satisfaction and sales by providing efficient and communicative service that facilitated faster product selection and an optimized checkout process.
- Collaborated in periodic team meetings, actively contributing to the definition of strategies to increase product sales and marketing.

Projects

Spotify Clone App (React-Typescript-Firebase-Vite)

2024

Personal/Institutional Project

- Designed and developed a full-stack music streaming platform, implementing secure authentication, playlist management, and audio playback functionality.
- Built and optimized a scalable database structure to handle user accounts, songs, and playlists efficiently.
- Implemented CRUD operations and RESTful APIs to manage music libraries and user interactions.
- Applied software engineering best practices including version control, modular architecture, and clean code principles.

Tetris Game (Python)

2024

Personal/Institutional Project

- Designed and developed a fully functional Tetris game in Python, implementing core mechanics such as piece movement, rotation, and line-clearing logic.
- Applied object-oriented programming principles to ensure code reusability and maintainability.

High School Classes Content Program (C#-SQL)

2021

Personal/Institutional Project

- Designed and developed a C# desktop application aimed at helping 10th and 11th grade students reinforce their learning by accessing all yearly material from the main school subjects.
- Implemented features for content browsing, student notes/comments storage, and yearly updates of new academic material.

Education

DEC – Computer Science – Programming

2023 - Present

LaSalle College, Montreal, QC

High School Diploma – Specialization in Computer Science

2018 – 2021

Instituto Diversificado Albert Einstein

Mosquera, Colombia
